Quality in Focus – Environment in mind

Use of Connected Luminaries Results to Energy and Cost Savings

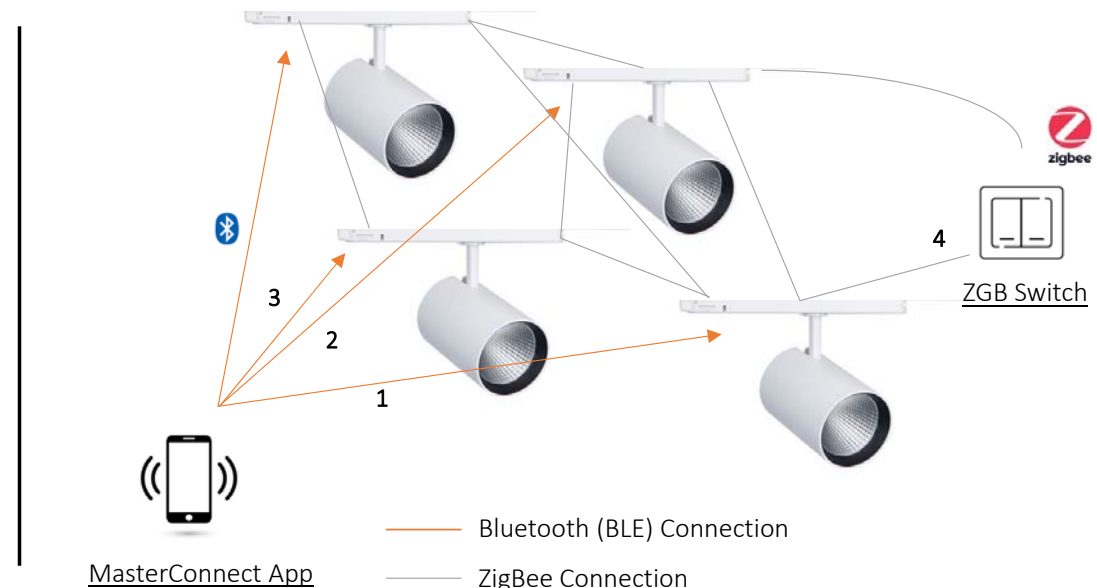

Lival CC Wireless Connected Solutions offers you future proof wireless control of luminaries, delivering fast and simple installation with less accessories and components. It allows you to control individual light points – as well as groups – easy with options for parameters, light level settings and time sequences. Luminaries are controlled via MasterConnect App – free for downloading at Google PlayStore for Android and App Store for iPhones – and smart switches plus occupancy/daylight sensors (optional).

Make Your Store's Lighting Smart

Upgrade to energy efficient, connected lighting without changes over the existing track installation. No new control wires needed, resulting to **significant savings in installation time** (Measured up to 25-50%).

Energy and Cost Saving

By integrating occupancy sensors and daylight harvesting to your luminaire network, you can **save up to 80% in your energy consumption**.

CC Wireless - Solutions for Connected Lighting

Lival CC Wireless Connected Solutions are available with all our popular reflector types. Our Premium White High Efficiency light is market leader in LED efficiency and quality of light, making our luminaires perfect fit for all retail applications.

Best Balance in Performance to Cost

Lival spotlights are globally known for their **best balance in performance to cost**. Equipped with CC Wireless connected adapters, you can design energy optimized lighting schemes for all areas of retail.

Seamless Integration with Global Trac Rail System

1. Designed for Global Trac PRO (XTS, XTSE) and PULSE (XTSC, XTSCF) rail systems, CC Wireless solutions are quick to install and commissioning is all done via user friendly mobile app.

Bingo CC

Dimming:

- Wireless Bluetooth Low Energy (BLE), Wireless Zigbee.
